## **Chemical Analysis of Firearms, Ammunition, and Gunshot ...**

While most books on firearms focus solely on the physical aspects of firearms, this book addresses forensic issues relating to the chemical aspects of firearms and ammunition. It draws on the latest published literature including books, scientific papers, technical reports, manufacturer's literature, newspaper articles, and personal observations and research conducted by the author.

piling information from the available literature and supplementing gaps with private communications and personal observations and research, Chemical Analysis of Firearms, Ammunition, and Gunshot Residue summarizes the history of firearms and ammunition as it relates to the development of modern weapons. It details chemical aspects of forensic firearms casework with particular emphasis on the detection of gunshot residues (GSR) on a suspect<sup>TM</sup>s skin and clothing surfaces.

## **Chemical Analysis Of Firearms, Ammunition, And Gunshot ...**

Firearms and their associated ammunition, spent bullets, and spent cartridge cases provide useful information for identifying suspects, terrorist groups, and the criminal history of a weapon. Unfortunately, despite the numerous detailed books on the physical aspects of firearms, very little has been published on the chemical aspects, and what has been published is sparse and fragmented.

**History of Ammunition Chemical Analysis Of Firearms**

Rimfire cartridges are still manufactured but only in 0.22" and 0.17" calibers and all other modern firearms ammunition is centerfire (central fire). Centerfire cartridges were produced by Pauly in 1808 but it was not until 1854 that the firm of Smith & Wesson perfected and patented both the center fire and rimfire metallic cartridge case.
