Each worksheet in this unit offers nine composite rectilinear shapes. Add up the measurements of all the sides to compute the perimeter of the rectilinear shapes in this array of worksheets. Add up the measurements of all the sides to compute the perimeter of the rectilinear shapes in this array of worksheets.

Area and Perimeter of Geometric Figures Worksheets

Area is a bit different than perimeter. While perimeter focuses on the outside of a shape, area focuses on what's on the inside of that shape. Since not all shapes are constant, there are different methods for measuring and calculating area of different shapes. The most common measures of area are for squares, rectangles, and triangles. This worksheet section will focus on these shapes. These ...
